SOLUTION

Every detail matters. Because every patient matters.

AW Review Station

We do the processing, so you can focus on the analysis.

In a rapidly changing clinical environment, referring physicians need quick and detailed understanding of pathologies to deliver effective and safe patient therapy. They expect faster, more advanced views of abnormal conditions across the entire range of care areas.

The whole reading experience, from image acquisition to result reporting, is supported by reviewing stations with fast technological cycle time, in order to respond to constantly increasing need for expert clinical applications requiring huge data sets manipulation and multi-modality comparison overtime.

How can you keep the clinical and technological edge, ensuring the optimal utilization of your imaging equipment and maximizing your most valuable asset: time?

Upgrade your Advantage Workstation to the latest version

- to be faster and more efficient;
- to increase your clinical expertise or scope;
- to remotely access and share your images in real time for increased diagnostic confidence;
- or to simply get the most out of your imaging equipment.

GE Healthcare

Accelerate your workflow through powerful hardware and smart automated user interface i.e. with preprocessing. When you open a clinical case, the images you want are ready to read.

Access the latest clinical applications, either to keep the clinical edge on your current procedures or open up to new care areas, be it cardiovascular, neurology, oncology or interventional.

Collaborate easily by accessing your AW remotely or sharing images in order to increase your diagnostic confidence. Wherever you are, your new AW is totally connected.

AW is the Advanced Visualization solution for CT, MR, PET and Interventional.

For NM and Mammography, consult us for the possibility to upgrade your current Review Stations to Xeleris 3* and IDI.

For more information, please contact your local GE Healthcare Service representative.

About GE Healthcare

GE Healthcare provides transformational medical technologies and services to meet the demand for increased access, enhanced quality and more affordable healthcare around the world. GE (NYSE: GE) works on things that matter - great people and technologies taking on tough challenges. From medical imaging, software and IT, patient monitoring and diagnostics to drug discovery, biopharmaceutical manufacturing technologies and performance improvement solutions, GE Healthcare helps medical professionals deliver great healthcare to their patients.
