

GE Healthcare

Imagination at Your Service

Imagination at Your Service

Every day is different. Every procedure is different.

At GE Healthcare Services, we understand just how demanding this can be, as every healthcare institute has different challenges.

So whether your focus is enhanced clinical outcomes, improved efficiency or optimized patient safety, we listen to your needs and think ahead with you.

With our access to the latest technology and our legacy of expertise, we can offer you the right service solution.

Every detail matters. Because every patient matters.

Enabling a safer environment for you

Ensuring that your hospital is a safe, hazard-free environment is crucial for both patients and staff. That is why at GE Healthcare we have placed safety at the core of everything we do, and have developed a suite of services that help you deliver on your safety goals.

Impact of high standard Preventive Maintenance (PM)

Preventive Maintenance is not only designed to pro-actively maintain equipment and ensure it is up and running for the maximum amount of time, it is also designed to ensure the safety of both patients and staff using this equipment, through a range of standardized checks and tests depending on the type of equipment:

- Calibration to control the dose of radiation
- Electrical and mechanical safety checks to prevent potential hazards
- Investing in PM tool-kits and in their regular upgrades
- Thorough checking of emergency circuits and warning indicators
- Patient Table Checks to prevent malfunction during diagnosis or operations
- Frequent safety Field Modification Instructions (FMI's) to correct any safety issues that are identified on the system
- Making sure equipment settings are as per the manufacturer's specifications

Use of certified parts

GE Healthcare services use original or refurbished parts that are manufactured/processed at sites operating under GEHC Quality Management System controlled environments or sourced from GE Healthcare approved suppliers compliant with global regulations and quality standards but also compliant with local regulations to repair and maintain medical equipment.

- GE Healthcare manufacturing sites operate at international quality standards certified facilities and/or at global/local regulatory bodies approved sites in compliance with ISO guidelines
- Globally dedicated team of more than 300 people focused on quality assurance activities in the fields of medical device production, supplier quality and regional QMS management in compliance with the guidelines

Enabling a safer environment for you

Dose Management

The appropriate radiation dosage is essential for diagnostic imaging practices, for each patient and every exam received over time. DoseWatch* enables you to monitor and manage radiation dose across your entire system, so you can:

Drive Awareness with cumulative dose tracking across the health system to assess radiation dose delivered to patients undergoing a variety of imaging procedures.

Optimize Performance through analytical tools to optimize the balance between IQ and dose, helping to improve patient care while minimizing risk.

Enable Compliance with reporting capabilities to internal stakeholders, patients, external governing bodies, and regulatory authorities.

DoseWatch

DoseWatch is a web-based dose management solution that captures, tracks, and reports radiation dose directly from the medical device, multi-modality and vendor agnostic. You can deliver the right dose by detecting the causes of excessive radiation and producing sharp and focused diagnostic images with lower exposure.

With GE Healthcare's DoseWatch, you can:

- Analyze radiation data across modalities and devices
- Identify and alleviate the causes of dose outliers
- Turn raw data into standards-based information

Closer to you, closer to your needs

At GE Healthcare, we understand that caring for patients and improving a hospital's efficiency is a major goal, and a challenge that is faced by most healthcare facilities. Experience has shown that this is most efficiently achieved through the optimum use of assets and equipment, and through optimized work processes and patient management systems. That is why we developed a suite of services and a global support network that help you do just that.

Local Service Delivery Infrastructure

An experienced local team, supported by global expertise, always available to provide faster and accurate service adapted to your needs.

Saudi Arabia

- 100+ field and remote engineers
- 100+ hours/year training per engineer
- Average 12 years experience

Service Center

A personalized customer service

- Dedicated toll-free hotline
- Fully trained call center agents
- 10 seconds response time

Global Team

- 8,000+ field and remote engineers
- 100+ hours/year training per engineer
- Average 15 years' experience

Warehouse

Strategically located to ensure real-time availability

- 65% of necessary parts are available same day while other 35% can be delivered within 96 hours
- More than 8000 parts in stock

Repair Centers

Simplify your life

- 2 Centers to provide effective and economical repair solutions
- Increases uptime and improves productivity

Closer to you, closer to your needs

Digital Services

GE Healthcare services has created a complete portfolio of digital platforms that empowers you with knowledge, tools and expertise that enable you to improve diagnostic capabilities and to increase efficiency.

OnWatch*

Proactive Monitoring Service

Support that never sleeps, OnWatch* enables you to achieve greater efficiencies by delivering optimum availability

- Proactively monitors hundreds of parameters 24/7
- Anticipates and forewarns of potential issues to reduce system failure
- Minimizes workflow disruption

InSite*

Remote Technical Support Service

A service platform engineered for a fast and efficient response, reducing repair time

- Secure broadband service enables the repair of 30% of issues remotely in less than 20 mins
- Provides priority access to online technical experts with a single click via ilinq™
- Delivers automatic system updates

AppsLinq*

Clinical Application Support Service

Connect with an application expert for assistance or training at any time

- Reduce scan time and optimize protocol for improving image use
- Schedule coaching sessions at a time that suits you best

iCenter*

Performance and Asset Management Service

Reduces costs and improves efficiency by providing a consolidated overview of your facility's equipment status

- Monitors patient volume per asset
- Tracks system uptime / downtime
- Identifies the number of maintenance tasks scheduled and performed per system

Closer to you, closer to your needs

Asset Management

How well hospitals manage their mobile clinical assets is a key factor in the cost and quality of care delivery. Many hospitals are losing millions of dollars and potentially putting patients at risk because of bloated and underutilized asset inventories, ineffective workflow processes, lack of asset information, and limited maintenance and service practices.

The Asset Management practice gives healthcare organizations access to operational expertise, proven methodologies and enables technologies to help dramatically improve the availability and utilization of assets. GE can help drive efficient patient care and reduced operating and capital expense.

AssetPlus

Computerized maintenance management solution for healthcare.

- Makes life easier for your staff by providing instant access to inventory data for every asset, preventive and corrective maintenance requests from all departments, stocks of spare parts and consumables and statistical reports and dashboards.
- Tracks service activity throughout the lifecycle of each device, helping you make the best use of your equipment. This means you can reduce downtime, optimize inventory levels, optimize maintenance contracts and service level agreements.
- Connects easily with your hospital or network wide IT system, including your hospital information system (HIS) and any financial or ERP systems providing instant access to reliable data.

A better outcome for everyone

In order to support you in your quest for enhanced clinical outcomes, GE Healthcare has designed a comprehensive set of information support services. These span education, image quality checks, networking with world-renowned Centers of Excellence and clinical experts.

Education Services

Faced with ever evolving technology and frequent updates to procedures, the continuous training and education of staff becomes the core of any healthcare institution's performance. Education is a main pillar of achieving better clinical outcomes and delivering quality care to patients.

That's why at GE we have developed an education curriculum that supports the development of all your staff in their respective roles; clinical, technical, managerial and leadership. Our teams of experts have designed an education syllabus that best fits your learning style, time schedule and budget needs.

Classroom

- Learn with hands-on experience on systems
- Opportunity to learn directly from a subject matter expert in the medical field
- Training provided in more than 80 countries in GE Education Academy and Mobile Training Centers
- Around 120 classrooms courses delivered every year
- More than 10,000 customers trained every year

A better outcome for everyone

On-Site

Acquire in-depth diagnostic knowledge and skills in your own environment

Immersion™

Acquire in-depth diagnostic. Shadow an expert from a world class medical center

- Education from an experienced healthcare professional
- Share best practices
- Learn new methods such as positioning, screening procedures, protocols and techniques
- Be exposed to the very latest healthcare practices

At your location

Get trained in your own environment and on your own equipment

- Gives you an opportunity to learn and create solutions to real issues at the same time
- Reduces mobility costs
- Enables powerful skill mastery on your own GE equipment
- More than 150 clinical education specialists delivering high-quality onsite training

Online

A variety of continuous education courses

@Live Expert

A live web connection with a world-renowned expert

- Learn from renowned clinical experts
- Share expertise and discuss complex cases
- Build your network
- Maximise knowledge in minimum time
- Self paced content

TiP-Ed OnlineSM

More than 200 online programs designed to support Radiologic Technologists in their quest for professional development

- Fast registration and easy content search
- Flexibility to create your own learning plan
- Print certificate anytime upon successful program completion
- Access leadership courses in addition to clinical courses

Everything you need, and nothing you don't

At GE Healthcare services, we understand that each healthcare institution has its own unique set of challenges and needs a personalized service solution specifically designed to accommodate its particular circumstance. We offer various service solutions to enable you to get the best value, response and support according to your budget and your operating requirements. This will boost the lifespan of your equipment, thereby enhancing your return on assets and maximizing the value of your ownership in the long run.

Life Cycle Management

A new life for your imaging systems. Better performance for you.

From thoughtfully designed additional features and components to the latest technologies and hardware and software upgrades, at any time over the lifespan of the equipment these solutions include the ability to:

- Optimize image quality thereby increasing your diagnostic confidence
- Boost your productivity and optimize your work
- Integrate your equipment with IT and streamline your procedures
- Expand your areas of practice and improve your quality of care
- Ensure compliance and meet requirements on dose limits

CarePlan Services

Suite of services specifically designed to focus on your needs so that you can focus on what matters the most - quality patient care.

Essential

To customize your service contract with the optimum service mix that best fits your budget whilst maintaining high quality care.

- Optimum support with guaranteed response time to ensure reasonable uptime
- Flexibility to choose from a range of options to maximize your budget allocation

Swift

To maximize your return on investment and productivity through increased uptime by swift intervention.

- Fastest priority service, remote and onsite, to maximize your equipment uptime
- Proactive monitoring of your system to minimize workflow interruptions
- Out-of-hours service to improve equipment availability and enhanced patient access

Absolute

To maximize your operational efficiencies through high performance by privileged personalized support, upgrades and training.

- Dedicated customer service agent
- Scheduled Preventive Maintenance support
- Ongoing application support and clinical education to ensure enhanced clinical outcomes
- Privileged access to the latest upgrades to enhance performance of your equipment
