Every detail matters. Because every patient matters.

InSite™

Real Time Service Solution

InSite™ is GE's advanced remote services technology that can instantly connect your asset with a GE services expert to resolve an issue on the spot, often remotely. If an onsite repair is required, a GE service engineer will arrive already armed with intimate knowledge of the problem and equipped to solve it quickly. InSite™ technology means GE can proactively monitor your critical medical equipment, identify potential problems and fix them before you feel the pain of unscheduled downtime and cost. It can even capture elusive intermittent faults which are difficult to observe on-site. With the power of InSite™, you will benefit from continuous efficiency in:

- Protection of Diagnostic Image Quality
- Prediction of Technical Issue
- Shorter Repair Time
- Equipment Performance Report

With InSite™, the privacy and security of both your practice and your patients is assured via:

- Virtual private network (VPN)
- IP security protocols (IPsec) encryption
- Audit trails
- Multi-layered defence for secure computing resources
- Patient information automatically anonymized as part of the image data retrieval process
- Only authorized, trained GE professionals can access your system in compliance with GE customer data policies and procedures

We'll help you get connected

From explaining the benefits and requirements of broadband and providing information on design and technical aspects, to planning and installation.

We will work with you to:

- Assess compatibility with GE Healthcare Services hardware
- Get appropriate approvals
- Plan and schedule your VPN configuration
- Involve and support your IT team

Closer to you. Closer to your needs.

For more information, please contact your local GE Healthcare Service representative.

About GE Healthcare

GE Healthcare provides transformational medical technologies and services to meet the demand for increased access, enhanced quality and more affordable healthcare around the world. GE (NYSE: GE) works on things that matter - great people and technologies taking on tough challenges. From medical imaging, software and IT, patient monitoring and diagnostics to drug discovery, biopharmaceutical manufacturing technologies and performance improvement solutions, GE Healthcare helps medical professionals deliver great healthcare to their patients.
